

SENIOR FRONTEND ENGINEER

Kyma Interactive - Athens, hybrid

ABOUT THE ROLE

We build the booking experience used by several thousand travellers a day. You will own the front end of that journey.

REQUIREMENTS

Strong commercial experience with React and TypeScript in production applications.

Experience building and maintaining a shared component library or design system.

Demonstrated attention to web performance, including bundle size and load time.

Practical knowledge of web accessibility standards such as WCAG.

Experience writing end-to-end or integration tests for user journeys.

Comfortable collaborating directly with designers.

NICE TO HAVE

Experience with server-side rendering, for example Next.js.

Familiarity with WebGL or canvas-based visualisation.

Experience mentoring junior engineers.

WHAT WE OFFER

Hybrid working, a learning budget, and a genuinely good coffee machine.
